

Description

Over the Road Bus (OTRB) Daily Report

To modernize information dissemination, the Over the Road Bus (OTRB) ISAC in collaboration with American Public Transportation Association (APTA), the American Bus Association (ABA), and the Transportation Security (TSA), developed the OTRB Daily Report and associated Transportation Information Library.

The OTRB Daily report is developed from the numerous sources of intelligence available to the Transportation community today, focusing on counter-terrorism, suspicious activity reports, general security awareness, and cyber security. The Surface Transportation Security Information Library, available to those vetted to receive the OTRB Daily report, acts as an information repository housing all sources of information provided in the OTRB Daily report as well as other security products, information reviews, and intelligence not provided in the OTRB Daily report. The information serves as a resource for future research into threats or mitigation techniques.
