

Cyber Report

Description

Daily Open-Source Cyber Report

The Daily Open-Source Cyber Report is extracted from multiple sources by analysts with the Surface Transportation (ST) and Public Transportation (PT) Information Sharing & Analysis Centers (ISACs) to support ISAC members' cybersecurity awareness, protection, and mitigation. The report includes an Executive News section providing a roundup of pertinent daily cyber security news and a Technical Summary with subsections covering emerging threats and exploits; attacks, breaches, and leaks; security vulnerabilities, alerts, advisories, and updates; and tool news and updates.
